Why choose the Rothoblaas School House Kit?

INTERACTIVE LEARNING

Includes materials like pre-cut CLT panels, glulam beams, and miniature connectors. Guides students through building a miniature schoolhouse.

SOUNDPROOFING EXPLAINED

Explore how acoustic performance plays a crucial role in building comfort! The kit includes Rothoblaas XYLOFON® soundproofing strips to demonstrate how impact noise and vibrations are managed in mass timber construction.

BEYOND BUILDING

The learning doesn't stop at construction! The kit can be used as a springboard for further exploration

SUSTAINABILITY DISCUSSIONS

Highlight the environmental benefits of using wood in construction.

DESIGN THINKING

Encourage participants to design and build their own variations of the schoolhouse.

This tool provides a unique and engaging learning experience that goes beyond textbooks, fostering a passion for sustainable building practices.
