Solutions for Safety

# LIFELINE AND RAIL SYSTEMS

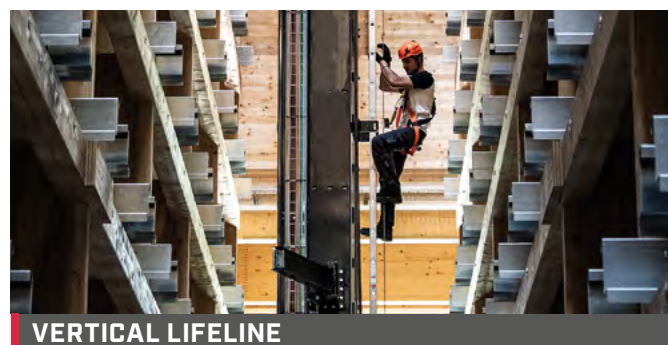

Our lifeline systems meet every design requirement: rope or rail, fixed or temporary, horizontal or vertical.

They are convenient systems for the operators: they allow easier movement than single points, are comfortable in use thanks to the through systems and offer the possibility of securing up to 4 operators at the same time.

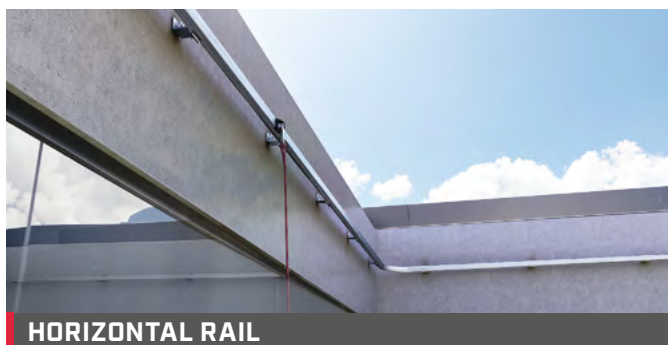

**HORIZONTAL LIFELINE**

PATROL system	combinations UP TO 12	operators UP TO 4	PASS/NON-PASS THROUGH solution
---------------	-----------------------	-------------------	--------------------------------

**VERTICAL LIFELINE**

VERTIGRIP system	combinations UP TO 6	operators UP TO 2	SLIDING solution
------------------	----------------------	-------------------	------------------

**HORIZONTAL RAIL**

H-RAIL system	combinations UP TO 4	operators UP TO 4	SLIDING solution
---------------	----------------------	-------------------	------------------

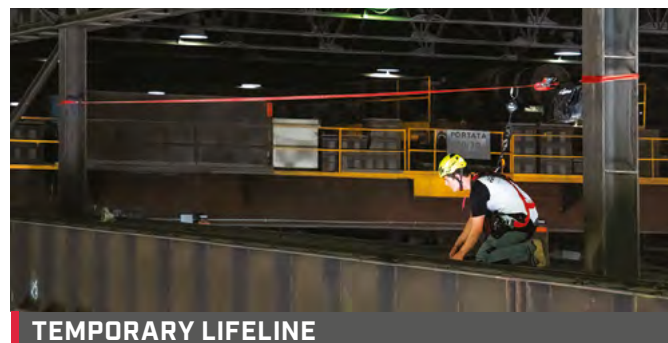

**VERTICAL RAIL**

V-RAIL system	combinations 1	operators UP TO 2	SLIDING solution
---------------	----------------	-------------------	------------------

**GREEN ROOF LIFELINE**

GREEN LINE system	visible NO	operators UNLIMITED see catalogue	anchor SUPPORTING SYSTEM
-------------------	------------	-----------------------------------	--------------------------

**TEMPORARY LIFELINE**

TEMPORARY system	operators UP TO 2 1 each span	HORIZONTAL use	
------------------	-------------------------------	----------------	--

## ONLINE DIGITAL SUPPORT

Rothoblaas Solutions for Safety is a complete product range, excellent service and utilities dedicated to the designer. On our website you will find many aids to simplify your design and give shape to your tailor-made fall protection solutions. # ANCHOR POINTS

Anchor points are the alternative or complement to life-lines. Those in the Rothoblaas Solutions for Safety range are designed to meet different construction requirements and to adapt to substrates made of various materials.

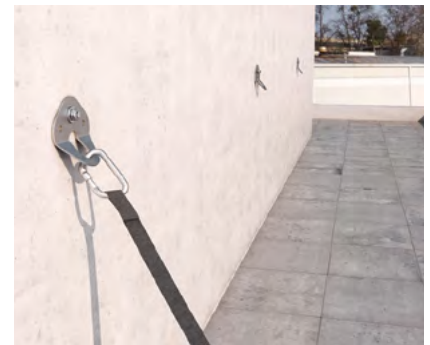

Designed for use with different techniques (anti-fall, restraint, suspension), they allow direct connection with the PPE, offering safety to a number of operators that can vary from 1 to 4 depending on the type of device.

**TIMBER**

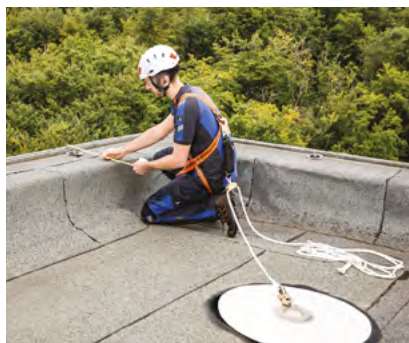

**STEEL**

**CONCRETE**

**METAL SHEET**

**OTHER**

# COLLECTIVE PROTECTION

Collective Protective Equipment (CPE) include all temporary or permanent devices designed to protect more than one operator from the risk of falling.

These include, for example, railings, textile and metal nets, ladders with and without cages, steps and other types of protection.

Thanks to the CPE it is possible to work safely even without PPE.

**RAILINGS**

PERMANENT / TEMPORARY

**FIXED LADDERS**

WITH AND WITHOUT CAGES

**FALL PROTECTION NETS**

PERMANENT / TEMPORARY

## WALKWAYS AND OVERPASSES

PERMANENT / TEMPORARY

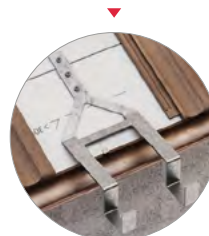

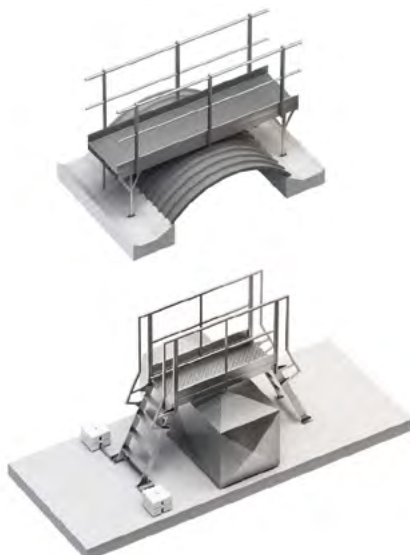

## LADDER HOOKS

MOBILE

FOR WALLS

PITCHED ROOFS

FLAT SURFACE

**Ladder hooks** are designed to prevent portable ladders from sliding sideways and frontally. Ideal for use where there is no internal access to the roof.

# PERSONAL PROTECTIVE EQUIPMENT

Personal Protective Equipment (PPE) includes any type of equipment designed to be worn or used by the workers in-order to protect them from risks that could threaten their safety while carrying out operations at height.

## PPE CHECK AND REVIEW

In addition to notifying the need for periodic inspection of equipment, Rothoblaas offers the mandatory annual revision service for 3rd category PPE.

# SOLUTIONS FOR CONFINED ENVIRONMENTS

Mobile systems and cranes for lowering, lifting and recovering loads and people, completed by a wide range of compatible accessories: all designed for the safety of installers and operators.

## TECHNICAL ASSISTANCE

Get maximum efficiency and performance from Rothoblaas solutions: a team of highly qualified technical consultants is always at the disposal of designers, technicians and installers.

- Consulting and checks for personal protective equipment
- Assistance for positioning and assembly of lifelines
- Technical documentation
- Accompanying certification
- Reference to standards

## ONLINE DIGITAL SUPPORT

Rothoblaas Solutions for Safety is a complete product range, excellent service and utilities dedicated to the designer. On our website you will find many aids to simplify your design and give shape to your tailor-made fall protection solutions.

- BIM and building details
- Product specifications
- Estimate spreadsheet
- Calculation software
- PPE check and review
